	Production	107	19
	Birth	95	16

Blonde d'Aquitaine has proven to be the best beef breed, when it comes to the value of net daily gain – and this where the income is.

Pollidness is a highly appreciated functional trait in a modern cattle production, not least because of the coincidence with consumer request and modern production systems.

The genes behind BABS SNAP PP GD

Dam: EHG Freja Pp

Several international judges at the Danish National Shows have described EHG Freja as one of Europe's best polled Blonde cows. She is very big with fine legs and a good confirmation as well as pelvis. She has won several Champion titles at the Danish National Show.
